

## PROFESSIONAL DEVELOPEMENT FOR MUSIC EDUCATORS

In partnership with the Baldwin Wallace University School of Education, the BW Community Arts School offers professional development opportunities for certified educators and teaching artists. Participants from around the world seek out opportunities to come to BW in the summer to learn from highly credentialed faculty.

The Institute for Music Teaching and Learning offers high-quality professional development for music educators in a format coordinated with Ohio Standards and contextualized for the music educator. All courses are offered for graduate credit through Baldwin Wallace University.

For teachers of all singing genres, the LoVetri Institute for Somatic Voicework™ is offered exclusively in partnership with Baldwin Wallace University. The summer session will be held on the Baldwin Wallace University Campus during the month of July.

## ABOUT US

BW's Division of Community Learning was designed in 2021 to develop, support, and administer community-based educational programs in all campus departments. Comprised of the Baldwin Wallace Community Arts School (established in 1972 as Community Outreach), Community Athletics & Recreation, and Community STEM Initiatives, we focus on creating accessible opportunities for the community to work alongside our faculty, staff, and students, and utilize the University's incredible facilities, resources, and expertise. Our goal is to foster lifelong learning and promote unending curiosity.

## EXPLORE!

By Age

# SUMMER CAMPS AND CLASSES

Summer with the Division of Community Learning at Baldwin Wallace University will be buzzing with activity. We have an exciting array of summer camps and classes designed to ignite the passion for learning and creativity in everyone, no matter their age! Through our Community Arts School, Community Athletics & Recreation, and Community STEM Initiatives, you will find something to suit every interest.

The Baldwin Wallace University campus in Berea, Ohio offers a safe and beautiful space to learn and grow. With its mix of historic and new buildings, air-conditioned dorms, green spaces and nearby community park with public pool and lake, there is no shortage of fresh air to enjoy.

## AGES 0-4

Early Learners benefit from our safe and engaging classes that encourage the development of fine and gross motor skills through Music and Movement, Dalcroze Eurhythmics and Fairytale Ballet. In each of these programs, our youngest students experience a variety of sights, sounds, rhythms, and cadences which enhance early language and brain development. Expert faculty create a positive learning environment to foster confidence.

## AGES 5-11

Opportunities for exploration, problem-solving, and activities that stimulate creativity and imagination await the elementary student. **YOUTH ATHLETICS CAMPS** in wrestling, football, baseball, and adventure sport camp await. **STEAM AND STEM** camps such as Flight & Art, STEM and Biomimicry, Dynamic Art Lego Building Adventure, and the very popular NASA Astro Camp® offer something for everyone. Older elementary students interested in **MUSIC AND PERFORMING ARTS** will enjoy the newly added piano and choir camps along with string, band, music theatre, and Dance Immersion camps. BW's Department of Education faculty have designed **CAMP-LEARN-A-LOT** to help

students entering grades K-5 reinforce literacy, mathematics, and social skills to get on track for the following school year. Faculty and coaches focus on building self-esteem and confidence in all students. These programs are fun and educational and benefit students of this age socially, physically, and interpersonally.

## AGES 12-14

Our programs for middle-school students offer many opportunities to explore and develop a vast array of interests. Our **YOUTH ATHLETIC CAMPS** for this age group include wrestling, basketball, baseball, football and more. Camps in **MUSIC AND PERFORMING ARTS** include Dance Immersion for older, more serious dancers, and our middle school music camps (string, band, music theatre, piano, and choir camps). **STEM** students would enjoy STEM and the 2024 Summer Olympics, Critical Thinking & Problem-Solving Camp or NASA Astro Camp®. Students of this age are eager to find their place in the world. A week spent with like-minded peers can help them on their journey of self-awareness.

## AGES 15-18

High school students might be ready to dive deeper into their athletic and academic interests or explore potential career pathways. **ATHLETIC PROSPECT CAMPS** (in wrestling, volleyball, baseball, basketball, volleyball, e-sports and more) offer students the opportunity to work with BW coaches and experience what it might be like to play at the next level. **MUSIC AND PERFORMING ARTS** camp opportunities include Dance Immersion, an 8-day intensive for those dancers who want to polish existing technique, learn new genres, and get a taste of the professional dance world, and Conservatory Summer Institute (CSI), a 9-day residential high school intensive for students seeking a rigorous summer experience. Direct instruction from conservatory faculty makes this ideal for students interested in studying music or music education in college. Additional opportunities include private lessons in music and a Group Piano Summer Retreat. **STEM** Discovery Camp offers curious students the chance to explore different engineering, physics, chemistry, and computer science related fields, while Critical Thinking & Problem-Solving Camp works out the brain to conquer challenging tasks and games.
